

Ice Shaver Machine

1. Set-Up Machine

- Place on stable table with the front of the machine facing the operator.

2. Load ice

- Open the lid on the top of the machine and fill compartment with ice. **Do NOT use crushed ice or ice cubes with a diameter greater than 2”.**
- Adjust the gray knob on front of the machine to control the size of the ice shavings. Turn knob left for coarser ice shaving; turn right for finer ice shavings.

3. Fill cup

- While holding cup under the out spout, turn on the power switch. Ice shavings will begin to fill the cup.

4. Pour flavor syrup over ice shavings

- Recommended amount of syrup is 1 - 2 ounces per serving.

5. Repeat steps 2-4 for additional servings, adding more ice as necessary.

6. If no ice is coming out of the machine, first check to make sure there is sufficient ice in the machine. If there isn't sufficient ice, add more ice. If there is sufficient ice, adjust the gray knob on front of machine until ice shavings begin to come out.

Cleaning Instructions: Empty the excess ice from the machine. Drain water from hose.
